

The enterprise-wide PC optimization and cleaning tool for a faster, more secure network

Once endpoints stop working at peak performance, your entire business slows down. Inefficient endpoints which slow, crash or run out of disk space decrease employee productivity and unnecessarily drain valuable IT resources.

On a multi-tenancy basis, CCleaner Network Professional's patented Network Registry and file cleaner free valuable hard drive space so Windows runs faster. The proactive network optimization tool operates from a single management console to schedule and deploy cleaning across an entire enterprise. Helpdesk costs are reduced, while reporting and auditing becomes easier. The tool also cleans traces of online activities to protect corporate security. CCleaner Network Professional is the powerful utility for running faster, cleaner, more secure endpoints across your whole network.

CCLEANER NETWORK PROFESSIONAL HIGHLIGHTS

1. The management console provides an at-a-glance view of your entire network and any areas that may require attention.

2. The patented Registry cleaner locates and fixes problems in the Registry to maintain stability.

3. Schedule proactive cleaning through the management console to run on a regular basis.

BUSINESS - STRENGTH SYSTEM OPTIMIZATION

- ✓ **Extend endpoint life cycles**
CCleaner Network Professional removes temporary files, memory dumps, log files and other unneeded data. It also defragments hard drives. The result is endpoints that last longer.
- ✓ **Lower support costs**
CCleaner Network Professional helps with slow endpoints by removing extraneous files and clearing hard drive space. More efficient endpoints mean lower support costs.
- ✓ **Boost security**
Browser history, cookies and logs can be security risks. CCleaner Network Professional erases them safely and can wipe free space and MFT free space.
- ✓ **Minimize downtime**
Application and system crashes mean lost data and lost productivity. CCleaner Network Professional improves Windows stability, reducing downtime.
- ✓ **Limit data loss**
Uninstalled software can leave behind Registry keys and broken items which can cause application and system crashes that lead to data loss. CCleaner Network Professional improves system stability and helps prevent data loss by clearing out the Registry.
- ✓ **Information at your fingertips**
CCleaner Network Professional's detailed management console gives you a bird's-eye view of your network and problem areas requiring your attention. You can remotely clean, defrag, and maintain any PC, right from your desktop.

FEATURES

CCleaner Network Professional is an enterprise solution for remote endpoint management and maintenance. The application runs as a service on an administrative server and provides access to a management console, while a lightweight agent runs on each endpoint. CCleaner Network Professional is multithreaded and architected for speed and network efficiency.

- 1 | Drill-down cleaning**
Clean and defrag a single endpoint, an Active Directory (or custom) group, or the entire network. It's just as easy to maintain the health of a single endpoint as it is the health of your entire organization's IT infrastructure.
- 2 | Full customization**
You choose what items to clean – by endpoint, group and network. You can also extend CCleaner Network Professional's cleaning abilities by adding your own entries for custom/OEM applications.

3 | Simplified network management

CCleaner Network Professional supports LDAP, proxy servers, and authenticated servers, simplifying license activation and upgrades. DHCP support enables dynamic IP address management. You can easily migrate your CCleaner Network Professional server with the service database import/export feature.

4 | Endpoint/group health at a glance

CCleaner's unique health score displays how much clutter and how much defragmentation exist on an endpoint or group of endpoints. You have vital information about what may be slowing endpoints down. You can follow up right away with a remote cleaning or defrag.

5 | Detailed reporting

CCleaner Network Professional has a built-in reporting tool that gives you access to a variety of reports for management, technicians, and CCleaner administrators. You can create table, bar, and pie reports and export them to Excel or as a PDF, CSV, image and more, for use elsewhere.

CCleaner Network Professional is the powerful utility that's essential for running faster, cleaner, more secure endpoints across your whole network.

PRODUCT EDITIONS AND LICENSING

CCleaner Network Professional's patented technology offers a host of unique features designed to make network management as easy as possible.

1 | Multi-network and multi-tenancy cleaning

CCleaner Network Professional is intended for use on 10 or more endpoints. Suitable for large enterprises and governments, the tools is licensed per endpoint but installed and maintained through a single administrative console.

2 | Defragmentation

CCleaner Network Professional includes Piriform's Defraggler tool, which speeds up endpoints by assembling fragmented files and organizing them in a more efficient way. The result is improved computing and extended hard drive life.

3 | Priority technical support

Our fully trained technical support team are on hand to answer all your questions – quickly. Diagnostic reports with single-click submission make contacting support hassle-free.

SYSTEM REQUIREMENTS

CCleaner Network Professional is fully tested and compatible with the following operating systems:

- Windows 10 (all editions, including 64-bit)
- Windows 8/8.1 (all editions, including 64-bit)
- Windows 7 (all editions, including 64-bit)
- Windows Vista (all editions, including 64-bit)
- Windows XP (all 32-bit and 64-bit)
- Windows Server 2003, 2008 and 2012 (all editions)
