- ✓ Remote Management
- ✓ Free Phone Support
- ✓ Always Updated

## Powerful new features that protect your business

**AVG® Internet Security Business Edition** is more powerful than ever before with new features designed to keep your critical business and customer data safe from ransomware, viruses, and malware. Protect your email and file servers and keep your employees safe online.

<b>Multi-Layer Ransomware Protection</b>	AVG's Business Editions utilize a multi-layered approach to detecting and eliminating ransomware. When a file passes successfully through one level of testing it is handed off to another layer for even more scrutiny.
<b>Protect against zero-day attacks with CyberCapture.</b>	CyberCapture isolates unknown files in a safe environment and establishes a two-way communication channel with you and AVG's team of expert security analysts.
<b>Scan faster with our new scanning engine</b>	AVG's scanning engine implements our most advanced algorithms that shorten scanning times so customers can work more efficiently and effectively.
<b>Business Firewall</b>	Protect your network from unauthorized access.
<b>Remote Management</b>	Easily deploy and manage your network antivirus software on your PCs, laptops and file servers.
<b>Email Protection</b>	Reduce your risk from online spam; scanning detects infected or rogue inbound attachments.
<b>Secure deletion with File Shredder</b>	File Shredder securely deletes data to help prevent unintended recovery.
<b>Online Shield</b>	Online Shield is improved with cloud-based detection to identify dangerous downloads faster than ever. Check files before you download them (including Secure File Sharing and Storage uploads/downloads) to help ensure they are safe and you stay protected.

## AVG INTERNET SECURITY BUSINESS EDITION

### **Stop online threats. Not business**

Keep business moving with AVG's award-winning endpoint protection. Protect your business network from ransomware, viruses and online threats. Block hackers and stop malware from taking over your computers or laptops on wired and wireless networks.

### **Keep employees safe online with Network Antivirus**

Free your workforce to surf, search and download with confidence. Smart prevention technology checks every web page and alerts you if it detects anything suspicious.

### **Keep business communication clean, clear and fast with Email Server Protection**

Send messages with confidence and remove clutter from your inbox. Reduce your risk of online spam; scanning detects infected or rogue inbound attachments.

### **Cloud Management Console**

The AVG Business Management Console makes it easy to deploy antivirus protection to multiple devices, manage all devices from one platform, schedule regular scans, and quickly add more devices.

### **Keep customer information safe from hackers with File Server Security**

Maintain your integrity as a reliable business partner by ensuring all your customer data is kept private.

### **Control your computers and servers with remote management from a single console**

Manage your endpoint protection and server antivirus software remotely on your network and stay in control no matter where you are. Easily deploy and manage your network antivirus software on your PCs, laptops and file servers.

### **Free phone support**

Breathe easy knowing that AVG experts are always a phone call away.

### **Smart, actionable alerts**

Detects and alerts you to problems that you can address easily from the simple dashboard.
